TRENTO

## ***INTEGRATED MANAGEMENT SYSTEM POLICY***

Printer Trento S.r.l., thanks to the awareness and responsibility of its management, agrees:

- to respect current legislation and other requirements;
- to prevent and reduce pollution and the risks of environmental accidents;
- to share its policies and environmental objectives with its stakeholders;
- to adopt policies for a sustainable purchase of the paper, in order to promote not only the environmental protection of forests but also to contribute to the economic development of the areas from which the cellulose come and to protect the populations living there;
- to decrease the usage of raw materials
- to continuously improve its management system.

This commitment translates then periodically in specific goals and targets for improvement, which are pursued through:

- the ongoing assessment of the environmental aspects associated with its own activities
- the training, awareness and involvement of its staff
- the purchase of paper from qualified suppliers with a particular attention towards products with Chain of Custody of Forest Stewardship Council (FSC) and Programme for the Endorsement of Forest Certification schemes (PEFC™);
- the reduction and optimization of energy consumption and raw materials;
- the constant research of measures needed to reduce ink usage, through devices with the best available technology at affordable cost and through optimized working procedures;
- the investments in advanced technologies
- the communication with customers and suppliers to improve, where possible, the environmental management.

To this end Printer Trento adopts an Integrated Management System that complies with the guidelines UNI EN ISO 14001 and Carbon Trust, with ISO 12647 and follows and applies the requirements specified by the standards of international certification such as FSC® and PEFC™.

Printer Trento recognizes that adopting an integrated management system is a useful tool to demonstrate its environmental commitment. The attention of international customers towards the environment is increasing day by day and Printer Trento, by adopting a valuable, secure and recognized tool, is showing another element of the constant renewal that have always characterized and distinguished the company.

The Management is therefore ready to invest all the human and economic resources necessary to its implementation and maintenance.
